

BRING

reduce | reuse | recycle | rethink

Introducing: The Box

The Box is a new tool developed by the folks at BRING and Lane County Waste Management. **The Box** comes in two varieties: a desk-side version and a larger container, complete with lid, ideal for centralizing recyclable material collection in the workplace.

In the wake of recent changes made to local recycling systems here in the PNW, it's now more important than ever for people and businesses to limit contamination in their recycling streams and "recycle it right." **The Box** is a free resource that can assist in these efforts and is available to current and past participants in the **Rethink** Business Program.

Studies show that strategic placement of waste collection stations can positively affect recycling habits and reduce waste.
